Barry now featured on Modelithics

Attleboro, MA 02703 - Barry Industries is pleased to announce our participation with Modelithics CLR Library. Modelithics is the industry's first and only substrate – and part value – scalable surface mount model library, and now allows designers to de-embed pad parasitic effects, enabling user-specified pad effects to be applied. Barry featured products are scalable resistors with sizes as low as 0405 to 1206.

Established in 1977, Barry provides a full line of Power and Precision Thick Film resistors, terminations and attenuators on Alumina, BeO, BeO Free[™] and Aluminum Nitride for your microwave and RF applications.

Barry also has an LTCC multilayer foundry, design and production facility for products to 40GHz. High Power Ceramic Packages, Machining and Electroplating – a vertically integrated company.
